1.Create a Master-Detail Relationship between two Custom objects and also create a Roll Up Summary Field to Calculate total number of records.

Screenshot of the Salesforce Setup interface showing the creation of a new custom object named "College".

**New Custom Object**

Custom Object Definition Edit

**Custom Object Information**

The singular and plural labels are used in tabs, page layouts, and reports.

Label	College	Example: Account
Plural Label	Colleges	Example: Accounts
Starts with vowel sound	<input type="checkbox"/>	

The Object Name is used when referencing the object via the API.

Object Name	College	Example: Account
-------------	---------	------------------

Description

Content-Sensitive Help Setting

Open the standard Salesforce.com Help & Training window  
 Open a window using a Visualforce page

Content Name

Content Name

Enter Record Name Label and Format

The Record Name appears in page layouts, key lists, related lists, lookups, and search results. For example, the Record Name for Account is "Account Name" and for Case it is "Case Number". Note that the Record Name field is always called "Name" when referenced via the API.

Record Name	College Name	Example: Account Name
-------------	--------------	-----------------------

Save Save & New Cancel

Screenshot of the Salesforce Tabs setup page.

**Tabs** - Step 1 of 1

**Custom Tabs**

You can create new custom tabs to extend Salesforce functionality or to build new application functionality.

Custom Object tabs look and behave like the standard tabs provided with Salesforce. Web tabs allow you to embed external web applications and content within the Salesforce window. Visualforce tabs allow you to embed Visualforce pages. Lightning Component tabs allow you to add Lightning components to the navigation menu in Lightning Experience and the mobile app. Lightning Page tabs allow you to add Lightning Pages to Lightning Experience and the mobile app.

**Custom Object Tabs**

22.21

Screenshot of the Salesforce Object Manager interface for the 'Department' object.

The left sidebar shows the following navigation:

- Details
- Fields & Relationships** (selected)
- Page Layouts
- Lightning Record Pages
- Buttons, Links, and Actions
- Compact Layouts
- Field Sets
- Object Limits
- Record Types
- Related Lookup Filters
- Restriction Rules
- Scoping Rules
- Triggers
- Flow Triggers

The main content area displays various field types with their descriptions:

- Currency: Allows users to enter a dollar or other currency amount and automatically formats the field as a currency amount. This can be useful if you export data to Excel or another spreadsheet.
- Date: Allows users to enter a date or pick a date from a pop-up calendar.
- Date/Time: Allows users to enter a date and time, or pick a date from a pop-up calendar. When users click a date in the pop-up, that date and the current time are entered into the Date/Time field.
- Email: Allows users to enter an email address, which is validated to ensure proper format. If this field is specified for a contact or lead, users can choose the address when clicking Send an Email. Note that custom email addresses cannot be used for mass emails.
- Geolocation: Allows users to define locations. Includes latitude and longitude components, and can be used to calculate distance.
- Number: Allows users to enter any number. Leading zeros are removed.
- Percent: Allows users to enter a percentage number, for example, '10' and automatically adds the percent sign to the number.
- Phone: Allows users to enter any phone number. Automatically formats it as a phone number.
- Picklist: Allows users to select a value from a list you define.
- Picklist (Multi-Select): Allows users to select multiple values from a list you define.
- Text: Allows users to enter any combination of letters and numbers.
- Text Area: Allows users to enter up to 255 characters on separate lines.
- Text Area (Long): Allows users to enter up to 131,072 characters on separate lines.
- Text Area (Rich): Allows users to enter formatted text, add images and links. Up to 131,072 characters on separate lines.
- Text (Encrypted): Allows users to enter any combination of letters and numbers and store them in encrypted form.
- Time: Allows users to enter a local time. For example, "2:40 PM", "14:40", "14:40:00", and "14:40:50:600" are all valid times for this field.
- URL: Allows users to enter any valid website address. When users click on the field, the URL will open in a separate browser window.

At the bottom right of the page are 'Next' and 'Cancel' buttons.

Screenshot of the 'New Custom Field' configuration screen for the 'Department' object.

The left sidebar shows the same navigation as the previous screenshot.

The main content area is titled 'Step 2. Enter the details' and includes the following fields:

- Field Label:  (with a small info icon)
- Field Name:  (with a small info icon)
- Description: (empty text area)
- Help Text: (empty text area)
- Required:  Always require a value in this field in order to save a record
- Unique:  Do not allow duplicate values
- External ID:  Set this field as the unique record identifier from an external system
- Auto add to custom report type:  Add this field to existing custom report types that contain this entity (with a small info icon)

Below these settings is a 'Default Value' section with a 'Show Formula Editor' button. A tooltip for the formula editor explains its syntax: "Use formula syntax. Enclose text and picklist value with names in double quotes. '{!the\_field}' include numbers without quotes. {!(#)} show percentages as decimal (0.10), and express date calculations in the standard format: {Today} + 7. To reference a field from a Custom Metadata type record use: \${CustomMetadataType\_\_r.records[Name].field\_\_c}"

At the top right of the configuration screen are 'Step 2 of 4', 'Previous', 'Next', and 'Cancel' buttons.

Screenshot of the Salesforce Object Manager page for the 'Department' object.

The left sidebar shows the navigation path: SETUP > OBJECT MANAGER > Department.

The main content area displays a list of field types:

Field Type	Description
Currency	Allows users to enter a dollar or other currency amount and automatically formats the field as a currency amount. This can be useful if you export data to Excel or another spreadsheet.
Date	Allows users to enter a date or pick a date from a pop-up calendar.
Date/Time	Allows users to enter a date and time, or pick a date from a pop-up calendar. When users click a date in the pop-up, that date and the current time are entered into the Date/Time field.
Email	Allows users to enter an email address, which is validated to ensure proper format. If this field is specified for a contact or lead, users can choose the address when clicking Send an Email. Note that custom email addresses cannot be used for mass emails.
Geolocation	Allows users to define locations. Includes latitude and longitude components, and can be used to calculate distance.
Number	Allows users to enter any number. Leading zeros are removed.
Percent	Allows users to enter a percentage number, for example, '10' and automatically adds the percent sign to the number.
Phone	Allows users to enter any phone number. Automatically formats it as a phone number.
Picklist	Allows users to select a value from a list you define.
Picklist (Multi-Select)	Allows users to select multiple values from a list you define.
Text	Allows users to enter any combination of letters and numbers.
Text Area	Allows users to enter up to 255 characters on separate lines.
Text Area (Long)	Allows users to enter up to 131,072 characters on separate lines.
Text Area (Rich)	Allows users to enter formatted text, add images and links. Up to 131,072 characters on separate lines.
Text (Encrypted)	Allows users to enter any combination of letters and numbers and store them in encrypted form.
Time	Allows users to enter a local time. For example, '2:40 PM', '14:40', '14:40:00', and '14:40:50.600' are all valid times for this field.
URL	Allows users to enter any valid website address. When users click on the field, the URL will open in a separate browser window.

At the bottom right of the page are 'Next' and 'Cancel' buttons.

Screenshot of the 'New Custom Field' creation wizard for the 'Department' object.

The left sidebar shows the navigation path: SETUP > OBJECT MANAGER > Department.

The main content area is titled 'New Custom Field' and is on 'Step 2. Enter the details'.

The form fields are:

Field Label	Dept_No.
Field Name	Dept_No
Description	(empty)
Help Text	(empty)

Below the form:

- Required:**  Always require a value in this field in order to save a record
- Auto add to custom report type:**  Add this field to existing custom report types that contain this entity

**Default Value:** Show Formula Editor

Use formula editor. Enclose text and picklist value with quotes in double quotes ("Dept\_No"). Include modulus without quotes (%). Shows percentages as decimal (.10), and performs date calculations in the standard format (Today() \* 7). To reference a field from a Custom-Metadata type record use: \$CustomMetadata.Type\_\_mdt.AliasName\$Field\_\_c

At the bottom right of the page are 'Previous', 'Next', and 'Cancel' buttons.

Specify the type of information that the custom field will contain.

Data Type

None Selected Select one of the data types below.

Auto Number A system-generated sequence number that uses a display format you define. The number is automatically incremented for each new record.

Formula A read-only field that derives its value from a formula expression you define. The formula field is updated when any of the source fields change.

Roll-Up Summary A read-only field that displays the sum, minimum, or maximum value of a field in a related list or the record count of all records listed in a related list.

Lookup Relationship Creates a relationship that links this object to another object. The relationship field allows users to click on a lookup icon to select a value from a pop-up list. The other object is the source of the values in the list.

Master-Detail Relationship Creates a special type of parent-child relationship between this object (the child, or "detail") and another object (the parent, or "master") where:

- The relationship field is required on all detail records.
- The ownership and sharing of a detail record are determined by the master record.
- When a user deletes the master record, all detail records are deleted.
- You can create rollup summary fields on the master record to summarize the detail records.

The relationship field allows users to click on a lookup icon to select a value from a pop-up list. The master object is the source of the values in the list.

External Lookup Relationship Creates a relationship that links this object to an external object whose data is stored outside the Salesforce org.

This screenshot shows a CRM application interface for a college named AVS. The top navigation bar includes a cloud icon, 'My-app', 'College' dropdown, and 'Department' dropdown. A search bar and various system icons are also present. The main view displays the 'Details' tab for the AVS college record. Key fields shown include:

- College Name:** AVS
- Total Count:** 0
- Created By:** Ajith (Ajith) on 18/10/2023, 3:28 pm
- Last Modified By:** Ajith (Ajith) on 18/10/2023, 3:28 pm
- Owner:** Ajith

A 'Full-screen' link and a 'Edit' button are visible at the top right of the details panel.

This screenshot shows a CRM application interface for creating a new department. The top navigation bar is similar to the previous screen, with a cloud icon, 'My-app', 'College' dropdown, and 'Department' dropdown. The main area is titled 'New Department' and contains a form with the following fields:

Information	
*Department Name	CSE
Email	cse@gmail.com
Phone	1234567899
*College	AVS

Below the form are three buttons: 'Cancel', 'Save & New', and 'Save'. A note at the top right indicates that an asterisk (\*) denotes required information. The left sidebar shows a 'Recently Viewed' section with 0 items updated a few seconds ago.

SETUP > OBJECT MANAGER Details

**Fields & Relationships**

- Lookup Relationship
- Master Detail Relationship
- External Lookup Relationship
- Checkbox
- Currency
- Date
- DateTime
- Email
- Geolocation
- Number
- Percent
- Phone
- Picklist
- Picklist (Multi-Select)
- Text

Creates a relationship that links this object to another object. The relationship field allows users to click on a lookup icon to select a value from a popup list. The other object is the source of the values in the list.

Creates a special type of parent-child relationship between this object (the child, or "detail") and another object (the parent, or "master") where:

- The relationship field is required on all detail records.
- The ownership and sharing of a detail record are determined by the master record.
- When a user deletes the master record, all detail records are deleted.
- You can create rollup summary fields on the master record to summarize the detail records.

The relationship field allows users to click on a lookup icon to summarize the detail records. The master object is the source of the values in the list.

Creates a relationship that links this object to an external object whose data is stored outside the Salesforce org.

Allows users to select a True (checked) or False (unchecked) value.

Allows users to enter a dollar or other currency amount and automatically formats the field as a currency amount. This can be useful if you export data to Excel or another spreadsheet.

Allows users to enter a date or pick a date from a popup calendar.

Allows users to enter a date and time, or pick a date from a popup calendar. When users click a date in the pop-up, that date and the current time are entered into the Date/Time field.

Allows users to enter an email address, which is validated to ensure proper format. If this field is specified for a contact or lead, users can choose the address when clicking Send an Email. Note that custom email addresses cannot be used for mass emails.

Allows users to define locations. Includes latitude and longitude components, and can be used to calculate distance.

Allows users to enter any number. Leading zeros are removed.

Allows users to enter a percentage number, for example, '10' and automatically adds the percent sign to the number.

Allows users to enter any phone number. Automatically formats it as a phone number.

Allows users to select a value from a list you define.

Allows users to select multiple values from a list you define.

Allows users to enter any combination of letters and numbers.

Salesforce Setup - Tabs

Custom Tabs

You can create new custom tabs to extend Salesforce functionality or to build new application functionality.

Custom Object tabs look and behave like the standard tabs provided with Salesforce. Web tabs allow you to embed external web applications and content within the Salesforce window. Visualforce tabs allow you to embed Visualforce pages. Lightning Component tabs allow you to add Lightning components to the navigation menu in Lightning Experience and the mobile app. Lightning Page tabs allow you to add Lightning Pages to Lightning Experience and the mobile app.

Custom Object Tabs

3. Suppose there are 2 Users and they are having Create, Read, Edit access on Account Object with the same profile but we want to open up the access for one user to delete how will you implement the Security setting.

Screenshot of the Salesforce Setup interface showing the "New Custom Object" page.

The page title is "SETUP New Custom Object".

Custom Object Definition Edit

**Custom Object Information**

The singular and plural labels are used in tabs, page layouts, and reports.

Label:  Example: Account

Plural Label:  Example: Accounts

Starts with vowel sound:

The Object Name is used when referencing the object via the API.

Object Name:  Example: Account

Description:

Context-Sensitive Help Setting:

Open the standard Salesforce.com Help & Training window

Open a window using a Visualforce page

Content Name:  None

Enter Record Name Label and Format

The Record Name appears in name dropdowns, New Sicht, Related Lists, Analytics, and search results. For example, the Record Name for Account is "Account Name" and for Case it is "Case Number". Note that the Record Name field is also called "Name" when referenced via the API.

4.Create a screen flow for a basic survey to fill in the details for any form.

Screenshot of the Salesforce Setup interface showing the "New Custom Object" page.

The page title is "SETUP New Custom Object".

Custom Object Definition Edit

**Custom Object Information**

The singular and plural labels are used in tabs, page layouts, and reports.

**Label:** Bank (Example: Account)

**Plural Label:** Banks (Example: Accounts)

**Starts with vowel sound:**

The Object Name is used when referencing the object via the API.

**Object Name:** Barik (Example: Account)

**Description:**

**Content Name:**  (Content-Sensitive Help Setting)  
Open the standard Salesforce.com Help & Training window  
Open a window using a Visualforce page

**Enter Record Name Label and Format**

The Record Name appears in name lists, key lists, related lists, lookups, and search results. For example, the Record Name for Account is "Account Name" and for Case it is "Case Number". Note that the Record Name field is always called "Name" when referenced via the API.

Save Save & New Cancel

Specify the type of information that the custom field will contain.

**Data Type**

None Selected Select one of the data types below.

Auto Number A system-generated sequence number that uses a display format you define. The number is automatically incremented for each new record.

Formula A readonly field that derives its value from a formula expression you define. The formula field is updated when any of the source fields change.

Roll-Up Summary A readonly field that displays the sum, minimum, or maximum value of a field in a related list or the record count of all records listed in a related list.

Lookup Relationship Creates a relationship that links this object to another object. The relationship field allows users to click on a lookup icon to select a value from a popup list. The other object is the source of the values in the list.

Master-Detail Relationship Creates a special type of parent-child relationship between this object (the child, or "detail") and another object (the parent, or "master") where:

- The relationship field is required on all detail records.
- The ownership and sharing of a detail record are determined by the master record.
- When a user deletes the master record, all detail records are deleted.
- You can create rollup summary fields on the master record to summarize the detail records.

The relationship field allows users to click on a lookup icon to select a value from a popup list. The master object is the source of the values in the list.

External Lookup Relationship Creates a relationship that links this object to an external object whose data is stored outside the Salesforce org.

Cloud My-app Recently Viewed College Department Details Management Customers Bank

Customers Recently Viewed ▾

0 items • Updated a few seconds ago

Total Life Time Value Name

Full-screen Sip

You haven't viewed any Customers recently.  
Try switching list views.

The screenshot shows the Salesforce Lightning Experience interface. At the top, there's a navigation bar with tabs like WhatsApp, Job Profile, Flows, Flow Builder, and Lightning Experience. Below that is a secondary navigation bar with categories like My-app, Recently Viewed, College, Department, Details, Management, Customers, and Bank. Under the Customers category, there's a sub-section titled 'Recently Viewed' with a dropdown arrow. It displays a message: '0 items • Updated a few seconds ago'. Below this, there's a table header with columns for 'Total Life Time Value' and 'Name', and a 'Full-screen Sip' button. At the bottom of the list area, there's a message: 'You haven't viewed any Customers recently. Try switching list views.'.
