Batch : 2024
Zone no : Zone 8

1.Create a Master-Detail Relationship between two Custom objects and also create a Roll Up Summary Field to Calculate total number of records.

Screenshot of the Salesforce Setup interface showing the creation of a new custom object named "College".

New Custom Object

Custom Object Definition Edit

Custom Object Information

The singular and plural labels are used in tabs, page layouts, and reports.

Label: College (Example: Account)
Plural Label: Colleges (Example: Accounts)
Starts with vowel sound:

The Object Name is used when referencing the object via the API.

Object Name: College (Example: Account)

Description:

Content-Sensitive Help Setting: Open the standard Salesforce.com Help & Training window
 Open a window using a Visualforce page

Content Name:

Enter Record Name Label and Format

The Record Name appears in page layouts, key lists, related lists, lookups, and search results. For example, the Record Name for Account is "Account Name" and for Case it is "Case Number". Note that the Record Name field is always called "Name" when referenced via the API.

Record Name: College Name (Example: Account Name)

Screenshot of the Salesforce Tabs setup page.

Tabs - Step 1 of 1

Custom Tabs

You can create new custom tabs to extend Salesforce functionality or to build new application functionality.

Custom Object tabs look and behave like the standard tabs provided with Salesforce. Web tabs allow you to embed external web applications and content within the Salesforce window. Visualforce tabs allow you to embed Visualforce pages. Lightning Component tabs allow you to add Lightning components to the navigation menu in Lightning Experience and the mobile app. Lightning Page tabs allow you to add Lightning Pages to Lightning Experience and the mobile app.

22.21

Screenshot of the Salesforce Object Manager interface for the 'Department' object.

The left sidebar shows navigation links: Details, Fields & Relationships, Page Layouts, Lightning Record Pages, Buttons, Links, and Actions, Compact Layouts, Field Sets, Object Limits, Record Types, Related Lookup Filters, Restriction Rules, Scoping Rules, Triggers, and Flow Triggers.

The main content area displays various field types with their descriptions:

- Currency: Allows users to enter a dollar or other currency amount and automatically formats the field as a currency amount. This can be useful if you export data to Excel or another spreadsheet.
- Date: Allows users to enter a date or pick a date from a pop-up calendar.
- Date/Time: Allows users to enter a date and time, or pick a date from a pop-up calendar. When users click a date in the pop-up, that date and the current time are entered into the Date/Time field.
- Email: Allows users to enter an email address, which is validated to ensure proper format. If this field is specified for a contact or lead, users can choose the address when clicking Send an Email. Note that custom email addresses cannot be used for mass emails.
- Geolocation: Allows users to define locations. Includes latitude and longitude components, and can be used to calculate distance.
- Number: Allows users to enter any number. Leading zeros are removed.
- Percent: Allows users to enter a percentage number, for example, '10' and automatically adds the percent sign to the number.
- Phone: Allows users to enter any phone number. Automatically formats it as a phone number.
- Picklist: Allows users to select a value from a list you define.
- Picklist (Multi-Select): Allows users to select multiple values from a list you define.
- Text: Allows users to enter any combination of letters and numbers.
- Text Area: Allows users to enter up to 255 characters on separate lines.
- Text Area (Long): Allows users to enter up to 131,072 characters on separate lines.
- Text Area (Rich): Allows users to enter formatted text, add images and links. Up to 131,072 characters on separate lines.
- Text (Encrypted): Allows users to enter any combination of letters and numbers and store them in encrypted form.
- Time: Allows users to enter a local time. For example, "2:40 PM", "14:40", "14:40:00", and "14:40:50:600" are all valid times for this field.
- URL: Allows users to enter any valid website address. When users click on the field, the URL will open in a separate browser window.

Buttons at the bottom right include 'Next' and 'Cancel'.

Screenshot of the 'New Custom Field' configuration page for the 'Department' object.

The left sidebar shows navigation links: Details, Fields & Relationships, Page Layouts, Lightning Record Pages, Buttons, Links, and Actions, Compact Layouts, Field Sets, Object Limits, Record Types, Related Lookup Filters, Restriction Rules, Scoping Rules, Triggers, and Flow Triggers.

The main content area is titled 'Step 2. Enter the details' and includes the following fields:

- Field Label: Dept_mail
- Field Name: Dept_mail
- Description: (empty)
- Help Text: (empty)
- Required: Always require a value in this field in order to save a record
- Unique: Do not allow duplicate values
- External ID: Set this field as the unique record identifier from an external system
- Auto add to custom report type: Add this field to existing custom report types that contain this entity

Below these settings is a 'Default Value' section with a 'Show Formula Editor' button. A note below the editor states: "Use formula syntax. Enclose text and picklist value with names in double quotes. ('The word'), include numbers without quotes: (10), show percentages as decimal: (1.10), and express date calculations in the standard format: (Today) + 7. To reference a field from a Custom Metadata type record use: \${CustomMetadataType__r.records[0].field__c}"

Buttons at the top right include 'Step 2 of 4', 'Previous', 'Next', and 'Cancel'.

Screenshot of the Salesforce Object Manager - Department page showing various field types and their descriptions.

Specify the type of information that the custom field will contain.

Data Type

None Selected Select one of the data types below.

Auto Number A system-generated sequence number that uses a display format you define. The number is automatically incremented for each new record.

Formula A read-only field that derives its value from a formula expression you define. The formula field is updated when any of the source fields change.

Roll-Up Summary A read-only field that displays the sum, minimum, or maximum value of a field in a related list or the record count of all records listed in a related list.

Lookup Relationship Creates a relationship that links this object to another object. The relationship field allows users to click on a lookup icon to select a value from a pop-up list. The other object is the source of the values in the list.

Master-Detail Relationship Creates a special type of parent-child relationship between this object (the child, or "detail") and another object (the parent, or "master") where:

- The relationship field is required on all detail records.
- The ownership and sharing of a detail record are determined by the master record.
- When a user deletes the master record, all detail records are deleted.
- You can create rollup summary fields on the master record to summarize the detail records.

The relationship field allows users to click on a lookup icon to select a value from a pop-up list. The master object is the source of the values in the list.

External Lookup Relationship Creates a relationship that links this object to an external object whose data is stored outside the Salesforce org.

This screenshot shows a CRM application interface. At the top, there's a navigation bar with a cloud icon, the text "My-app", and dropdown menus for "College" and "Department". A search bar is located at the top right. Below the header, a card displays information for a college named "AVS". The card includes fields for "College Name" (AVS), "Total Count" (0), and two timestamped activity logs: "Created By" (jaganathan) on 18/10/2023, 3:28 pm, and "Last Modified By" (jaganathan) on the same date and time. There are tabs for "Related" and "Details", and a "Full-screen" button.

This screenshot shows a CRM application interface with a modal window titled "New Department". The window has a toolbar with buttons for "New", "Import", "Change Owner", and other actions. The main area is labeled "Information" and contains several input fields: "Department Name" (CSE), "Email" (cse@gmail.com), "Phone" (1234567899), and "College" (AVS). The "College" field is highlighted with a blue border. A note at the top right indicates that the "College" field is required. At the bottom of the modal are three buttons: "Cancel", "Save & New", and "Save". On the left side of the screen, there's a sidebar titled "Recently Viewed" showing a list of items, and the top navigation bar remains visible.

Setup Home Object Manager

SETUP > OBJECT MANAGER Details

Fields & Relationships

- Lookup Relationship
- Master Detail Relationship
- External Lookup Relationship
- Checkbox
- Currency
- Date
- DateTime
- Email
- Geolocation
- Number
- Percent
- Phone
- Picklist
- Picklist (Multi-Select)
- Text

Creates a relationship that links this object to another object. The relationship field allows users to click on a lookup icon to select a value from a popup list. The other object is the source of the values in the list.

Creates a special type of parent-child relationship between this object (the child, or "detail") and another object (the parent, or "master") where:

- The relationship field is required on all detail records.
- The ownership and sharing of a detail record are determined by the master record.
- When a user deletes the master record, all detail records are deleted.
- You can create rollup summary fields on the master record to summarize the detail records.

The relationship field allows users to click on a lookup icon to summarize the detail records. The master object is the source of the values in the list.

Creates a relationship that links this object to an external object whose data is stored outside the Salesforce org.

Allows users to select a True (checked) or False (unchecked) value.

Allows users to enter a dollar or other currency amount and automatically formats the field as a currency amount. This can be useful if you export data to Excel or another spreadsheet.

Allows users to enter a date or pick a date from a popup calendar.

Allows users to enter a date and time, or pick a date from a popup calendar. When users click a date in the pop-up, that date and the current time are entered into the Date/Time field.

Allows users to enter an email address, which is validated to ensure proper format. If this field is specified for a contact or lead, users can choose the address when clicking Send an Email. Note that custom email addresses cannot be used for mass emails.

Allows users to define locations. Includes latitude and longitude components, and can be used to calculate distance.

Allows users to enter any number. Leading zeros are removed.

Allows users to enter a percentage number, for example, '10' and automatically adds the percent sign to the number.

Allows users to enter any phone number. Automatically formats it as a phone number.

Allows users to select a value from a list you define.

Allows users to select multiple values from a list you define.

Allows users to enter any combination of letters and numbers.

7.JPG Details | Salesforce - Google arun2 NM assignment 22:31

Screenshot of the Salesforce Object Manager - Details page for a custom object.

The left sidebar shows navigation links: Details, Fields & Relationships (selected), Page Layouts, Lightning Record Pages, Buttons, Links, and Actions, Compact Layouts, Field Sets, Object Limits, Record Types, Related Lookup Filters, Restriction Rules, Scoping Rules, Triggers, and Flow Triggers.

The main content area displays a list of field types:

- Currency
- Date
- DateTime
- Email
- Geolocation
- Number
- Percent
- Phone** (selected)
- Picklist
- Picklist (Multi-Select)
- Text
- TextArea
- TextArea (Long)
- TextArea (Rich)
- Text (Encrypted) (1)
- Time
- URL

Descriptions for each field type are provided:

- Currency: Allows users to enter a dollar or other currency amount and automatically formats the field as a currency amount. This can be useful if you export data to Excel or another spreadsheet.
- Date: Allows users to enter a date or pick a date from a popup calendar.
- DateTime: Allows users to enter a date and time, or pick a date from a popup calendar. When users click a date in the pop-up, that date and the current time are entered into the DateTime field.
- Email: Allows users to enter an email address, which is validated to ensure proper format. If this field is specified for a contact or lead, users can choose the address when clicking Send an Email. Note that custom email addresses cannot be used for mass emails.
- Geolocation: Allows users to define location. Includes latitude and longitude components, and can be used to calculate distance.
- Number: Allows users to enter any number. Leading zeros are removed.
- Percent: Allows users to enter a percentage number, for example, '2%' and automatically adds the percent sign to the number.
- Phone: Allows users to enter any phone number. Automatically formats it as a phone number.
- Picklist: Allows users to select a value from a list you define.
- Picklist (Multi-Select): Allows users to select multiple values from a list you define.
- Text: Allows users to enter any combination of letters and numbers.
- TextArea: Allows users to enter up to 255 characters on separate lines.
- TextArea (Long): Allows users to enter up to 131,072 characters on separate lines.
- TextArea (Rich): Allows users to enter formatted text, add images and links. Up to 131,072 characters on separate lines.
- Text (Encrypted) (1): Allows users to enter any combination of letters and numbers and store them in encrypted form.
- Time: Allows users to enter a local time. For example, '2:40 PM', '14:40', '14:40:00', and '14:40:50.600' are all valid times for this field.
- URL: Allows users to enter any valid website address. When users click on the field, the URL will open in a separate browser window.

Buttons at the bottom right: Next, Cancel.

Screenshot of the Salesforce Object Manager - Details page for creating a new custom field.

The left sidebar shows navigation links: Details, Fields & Relationships (selected), Page Layouts, Lightning Record Pages, Buttons, Links, and Actions, Compact Layouts, Field Sets, Object Limits, Record Types, Related Lookup Filters, Restriction Rules, Scoping Rules, Triggers, and Flow Triggers.

The main content area shows "Step 2. Enter the details" for a "New Custom Field".

Form fields:

- Field Label: Phone
- Field Name: Phone
- Description: (empty)
- Help Text: (empty)
- Required: Always require a value in this field in order to save a record
- Auto add to custom report type: Add this field to existing custom report types that contain this entity (1)
- Default Value: Show Formula Editor

Help text for Default Value:

Use formula editor. Enclose text and picklist value API names in double quotes ('The word'), include numbers without quotes ('123'), show percentages as decimal (.123), and express date calculations in the standard format ('Today() + 7'). To reference a field from a Custom Metadata type record use: \${CustomMetadataType__r.Field__c}

Buttons at the bottom right: Previous, Next, Cancel.

Salesforce Setup Page - Details of a New Custom Field

The page shows the 'Details' tab selected under 'Fields & Relationships'. The field being created is named 'Phone' with a label 'Phone'. It is set to be added to the 'Details Layout'. The status bar indicates 'Step 4 of 4'.

Salesforce Setup - Tabs

Custom Tabs

You can create new custom tabs to extend Salesforce functionality or to build new application functionality.

Custom Object tabs look and behave like the standard tabs provided with Salesforce. Web tabs allow you to embed external web applications and content within the Salesforce window. Visualforce tabs allow you to embed Visualforce pages. Lightning Component tabs allow you to add Lightning components to the navigation menu in Lightning Experience and the mobile app. Lightning Page tabs allow you to add Lightning Pages to Lightning Experience and the mobile app.

Custom Object Tabs

Screenshot of the Salesforce Setup interface showing the "New Custom Object" page.

The page title is "SETUP New Custom Object".

Custom Object Definition Edit

Custom Object Information

The singular and plural labels are used in tabs, page layouts, and reports.

Label: Bank (Example: Account)

Plural Label: Banks (Example: Accounts)

Starts with vowel sound:

The Object Name is used when referencing the object via the API.

Object Name: Barik (Example: Account)

Description:

Content Name: (Content-Sensitive Help Setting)
Open the standard Salesforce.com Help & Training window
Open a window using a Visualforce page

Enter Record Name Label and Format

The Record Name appears in name lists, key lists, related lists, lookups, and search results. For example, the Record Name for Account is "Account Name" and for Case it is "Case Number". Note that the Record Name field is always called "Name" when referenced via the API.

Save Save & New Cancel

Specify the type of information that the custom field will contain.

Data Type

None Selected Select one of the data types below.

Auto Number A system-generated sequence number that uses a display format you define. The number is automatically incremented for each new record.

Formula A readonly field that derives its value from a formula expression you define. The formula field is updated when any of the source fields change.

Roll-Up Summary A readonly field that displays the sum, minimum, or maximum value of a field in a related list or the record count of all records listed in a related list.

Lookup Relationship Creates a relationship that links this object to another object. The relationship field allows users to click on a lookup icon to select a value from a popup list. The other object is the source of the values in the list.

Master-Detail Relationship Creates a special type of parent-child relationship between this object (the child, or "detail") and another object (the parent, or "master") where:

- The relationship field is required on all detail records.
- The ownership and sharing of a detail record are determined by the master record.
- When a user deletes the master record, all detail records are deleted.
- You can create rollup summary fields on the master record to summarize the detail records.

The relationship field allows users to click on a lookup icon to select a value from a popup list. The master object is the source of the values in the list.

External Lookup Relationship Creates a relationship that links this object to an external object whose data is stored outside the Salesforce org.

Video Tutorial | Help for this Page

This screenshot shows the 'Permission Sets' page in the Salesforce Setup. A permission set named 'managerbanksales' is selected. The 'Accounts' object permissions section is visible, showing that 'Read', 'View All', and 'Modify All' are enabled. Below it, the 'Field Permissions' section shows that 'Read Access' is enabled for the 'Name' field of the 'Account' object. The left sidebar lists various setup categories like Hyperforce Assistant, Lightning Experience Transition Assistant, and different types of Salesforce schedulers.

This screenshot shows the 'All Users' page in the Salesforce Setup. It lists several users with their details: 'jaganathan' (System Administrator), 'Chatter Expert' (Chatter Free User), 'consumer 1' (Marketing Team, consumer profile), 'Integration User' (Analytics Cloud Integration User), 'manager 1' (Marketing Team, Manager profile), 'manager 2' (Marketing Team, Solution Manager profile), and 'manager bank' (Marketing Team, Salesforce API Only System Integrator profile). The user 'manager bank' is currently selected. The left sidebar shows the same setup categories as the previous screenshot.

Cloud My-app Recently Viewed College Department Details Management Customers Bank

Customers Recently Viewed ▾

0 items • Updated a few seconds ago

Total Life Time Value Name

Full-screen Sip

You haven't viewed any Customers recently.
Try switching list views.

The screenshot shows the Salesforce Lightning Experience interface. At the top, there's a navigation bar with tabs like WhatsApp, Job Profile, Flows, Flow Builder, and Lightning Experience. Below that is a secondary navigation bar with categories like My-app, Recently Viewed, College, Department, Details, Management, Customers, and Bank. Under the Customers category, there's a sub-section titled 'Recently Viewed' with a dropdown arrow. It displays a message: '0 items • Updated a few seconds ago'. Below this, there's a search bar labeled 'Search this list...' and a set of icons for filtering and sorting. A large empty area below the search bar contains the message: 'You haven't viewed any Customers recently. Try switching list views.' There's also a 'Full-screen Sip' button at the bottom of this message area.
